## Description

The Tork Wave Manual system (H14) for hand towel rolls has a high capacity that is ideal for busy public washrooms.

## Shipping data

### Consumer unit

EAN	7322540656992
Pieces	1
Height	195 mm
Width	183 mm
Length	183 mm
Volume	6.5 dm <sup>3</sup>
Net weight	1445 g
Gross weight	1470 g

### Transport unit

EAN	7322540657012
Pieces	6
Consumer units	6
Material	Plastic
Height	195 mm
Width	360 mm
Length	540 mm
Volume	37.9 dm <sup>3</sup>
Net weight	8.67 kg
Gross weight	8.82 kg

## Environmental

Content

Virgin Pulp

Recycled fibres

Chemicals

Material

In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important.

The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material.

Bleaching of fibres

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view .

The used functional chemicals are:

Wetstrength agent

Dry strength agent

Dye = if coloured

Fixing agents

Glue = if used

The process chemicals are:

Antipitch

Protection agent

Yankee coating

Defoamer

Dispersing agents and surfactants

pH and charge control

Retention aids

Broke treatment chemicals

Drainage aid

## Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

## Food contact

This product fulfils the legislative requirements for Food Contact materials, confirmed by external certification performed by CTP FRANCE. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

## Environmental label

This product has EU ecolabel.

Date of issue : 2011

Revision date 2015-06-30

## Production

Material produced and converted at Hondouville mill, France, certified according to ISO 9001 : 2008 & ISO 14001 : 2004

## Destruction

HAND TOWEL is mainly used for personal hygiene and can be collected together with household waste.
